

Year 8 Geography: Year End Quiz

Instructions for the week beginning Monday 13th July 2020

Background:

We're going to end the year with a quiz of 25 questions. It covers many aspects of your studies since last September, including plate boundaries and their associated hazards (earthquakes, volcanoes etc), renewable and non-renewable energy resources, the water cycle, and globalisation.

There is no time limit. So, think carefully before you answer. Everyone can score top marks in this quiz if THEY TAKE THEIR TIME and THINK!

Do:

Answer the **quiz** of 25 questions that you will **find on SMH**. Good luck! And if I don't see you before the term ends, have a wonderful and healthy Summer.

Mr Bracken
